ABOUT US

S. L. J. HOLDINGS PVT. LTD.

SLJ HOLDINGS group of companies : *Sri Lanka, Malaysia and Australia* were established as private limited liability companies with the prime objective of supplying and catering to the much developing and growing needs of the Building and Construction Industry Worldwide.

By having it's fully owned representative offices in Sri Lanka, Malaysia and Australia to market and sell on stock/ indent basis to various small, medium and large scale companies and as well as to all the government/state owned enterprises.

Our Company profile could be viewed by logging on to our website, www.sljholdings.com which will give you a more detailed information on what we do and the products we sell.

We are currently supplying products such as Durkflex Insulation, U.P Twigla Glass Wool Insulation, Insul Boards (Polystyrene Boards), Heat Reflective Aluminum foil , Water Proofing Material, Cooling Towers, Trox Brand Air Ventilation products, Oventrop balancing valves, Reflex air dirt separators and expansion tanks and ISOVER pre insulated ducting and are representing international companies around the world as in India, Spain, United Kingdom, Italy, Belgium, Germany, Australia, India, China, Malaysia, Kuwait and Indonesia.

OUR GOAL is to develop SLJ Holdings (Pvt) Ltd. into being a firmly established Organization providing a wealth of knowledge, offering revolutionary technology and quality materials and service to the Building, Construction and HVAC/MEP industry.

We have been supplying material to this market from since 1979 and have developed quite a good share of the market for the products we supply.

Our customers range from Architects who recommend our products, to Contractors, Builders, to Traders and some do it yourself customers. We have supplied our products to many of the leading prestigious projects in Colombo and have also spread out island wide and presently concentrating on the export business side to the Republic of Maldives which we have achieved much success in our short period of time being there.

We are focused on ensuring that we deliver the best, in products as well as in customer service. We understand and accept that if we are to make a difference in this expanding market, our customers are the most important element. The staff of SLJ Holdings (Pvt) Ltd. has years of experience in this field of business and brings with them a wealth of knowledge to take the company to greater heights in the coming years.

Our Trading Activities

- HVAC/MEP Solutions
- Roofing, Insulation and Ducting
- Building products/accessories & fittings
- Waterproofing and Fiberglass

S.L.J. HOLDINGS PVT. LTD.

THE RIGHT CONNECTION

Setting the standards for
the Building Industry
in Sri Lanka

In the building industry we find,

- HVAC solutions
- MEP solutions
- Roofing solutions
- Waterproofing solutions
- Air handling solutions
- Cooling Towers
- Wall & Interior solutions

Our company was established with the prime objective of rendering valuable services to the upliftment /development of the growing needs of the Building and Construction Industry in Sri Lanka and abroad.

S.L.J. Holdings resources together with our suppliers are well organized for a single mission to provide a TOTAL SOLUTION to the root of all sort of building problems.

S.L.J. Holdings (Pvt) Ltd. a leader in supplying energy conservative and innovation building materials and its solutions wish to introduce our high quality proven products range/expertise/experience that can be provided by our technical team some having over 30 years of job experience beside technical support/training that can be provided by our suppliers at no extra cost.

We not only supply, we do installations and application work with a guarantee and is in a position to supply any other items from leading suppliers of the world to suit your requirement.

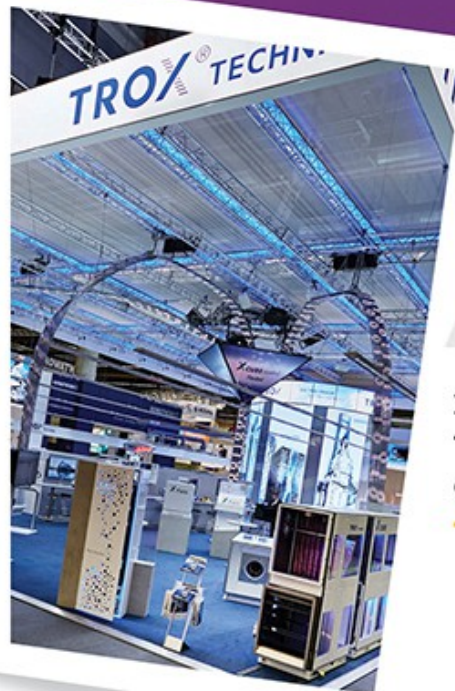

OUR STRENGTH lies in an UNRELENTLESS COMMITMENT to our customers, our expectations and demands, in our industry to our suppliers and to our own staff who takes pride and responsibility in what they do.

TROX PRODUCTS

(Active manufacturer of air distribution and air conditioning components.)

AIR DIFFUSERS

TROX[®] TECHNIK
The art of handling air

Designed for high comfort

Together with renowned designers and architects we have developed ceiling, wall, staircase and floor diffusers and grills that are not only aesthetic design elements but also meet demanding ventilation & acoustic requirements.

EXTERNAL LOUVRES - LOUVRE BLADES

AIR-WATER SYSTEMS

Air for the people - water for the loads

Today, air-water systems are used in many modern buildings and especially in office and administration buildings, offer energy-efficient solutions for the internal space ventilation and air conditioning. There is a variety of installation possibilities for air water systems, which means that, for almost every building, variants that meet the most demanding architectural requirements are available.

FIRE AND SMOKE PROTECTION

Tested and certified safety

The correct preventative measures and components can help to eliminate this risk and restrict the damage caused by fire. Fire safety components and systems help to minimize the risk of fire and prevent fire and smoke from spreading.

SOUND ATTENUATORS

CONTROL SYSTEMS

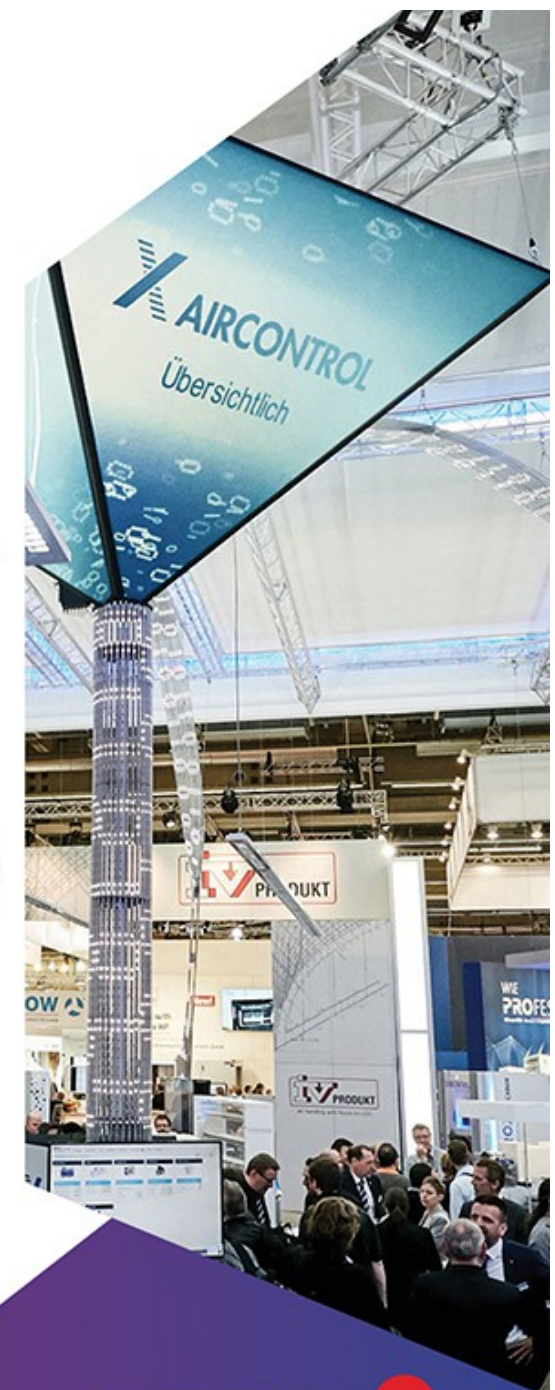

CONTROL UNITS

• X-FANS

CENTRAL AIR HANDLING UNITS

Twiga is the leading manufacturer of glass wool insulation in India having a twenty-five year track record of supplying domestic and export customers with world-class products for thermal and acoustic insulation.

An ISO 9001:2008 certified company, Twiga commenced its operations in 1979 and is a technology licensee of Isover Saint Gobain, the leading manufacturer of insulations worldwide.

Twiga Glasswool Insulation

Twiga Insul is a lightweight, compressible insulation material, consisting of fine, long, inorganic glass fibers bonded together by a high temperature binder. The product is light gold in colour and its superior tensile strength, handleability and resilience offer significant advantages during transport and installation. These unique characteristics of glass wool, combined with its fire safe properties, make it especially suitable for a wide variety of thermal and acoustic insulation applications, ranging from duct and metal roof insulation to applications in solar collectors and generator acoustic enclosures.

TWIGA INSUL GREEN BUILDING SOLUTIONS

Product**

Twiga Insul Duct Wrap

TWIGA Insul Duct Wrap Ductwrap, a light weight thermal insulation blanket having long product life is specifically designed to wrap around air conditioning ducts. Manufactured from fine, stable and uniformly textured non combustible inorganic glass fibers bonded together by a non water soluble and fire retardant binder.

**Twiga Insul
Duct Wrap**

Twiga Flexible Ducts

Twiga Flexible Duct designed for HVAC systems is light weight, strong, fully flexible and compressible yet dimensionally stable.

Twiga Flexible Duct is made of double lamination of films permanently bonded to a coated spring tough steel wire helix. Thermal efficiency is provided by wrapping the exterior with a blanket of fiberglass wool insulation in various densities & thicknesses for required thermal resistance. The outer jacket is made of double laminated film with fiberglass yarn reinforcement, which acts as a vapour barrier surface as well.

Twiga Flexible Duct can widely be used in all Air Conditioning/ Ventilating Systems including commercial & office buildings, hotels, hospitals and many other industrial and residential applications.

Pre Insulated Ducts

Fiberglass duct board is a rigid board of insulation material manufactured from resin bonded inorganic glass fibers. The exterior surface of the board is a factory-applied reinforced aluminium foil-air barrier and water vapour retarder.

The edges of the board are formed by machine to create a ship lapped edge or grooves, to allow the grooves to be joined to build straight ducts of any size or length. Duct system components such as tees, offsets, elbows and transitions may be fabricated from flat duct board. Fibrous glass duct boards are fabricated into ducts to make a fibrous glass duct system.

ROOF & HVAC INSULATION

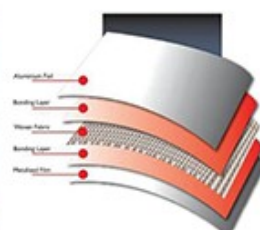

Aluminium Foil and Mesh

The main focus of this division is to provide a range of insulation products and solutions to the Heating, Air conditioning Industry and Roof Insulation Industry. The short description given below will explain the product we import and its applications and which markets are serviced through this division.

ALUMINIUM FOIL

SLJ Sisilation - 100 (Double Sided Reflective Aluminium foil insulation)

SLJ SISILATION - 735 (foil scrim kraft facing & vapor barrier)

SISILASION Heat Reflective Roofing is of superior quality and comes highly recommended by Consultant Architects and leading Contractors. It is a multi-laminated Aluminium foil manufactured in Australia, using the best of raw materials. It is ideally used under the roof, in walls, behind cladding or under timber floors for residential and commercial buildings. Can combining with Glasswool/ Rockwool/ Mineralwool/ Foam Insulation.

ALUMINIUM TAPE

Aluminum Tapes are available in two types as Reinforced and Non-Reinforced with different sizes starting from 2" up to 6". This product we use to join the insulation.

BRC WELDED ROOFING MESH

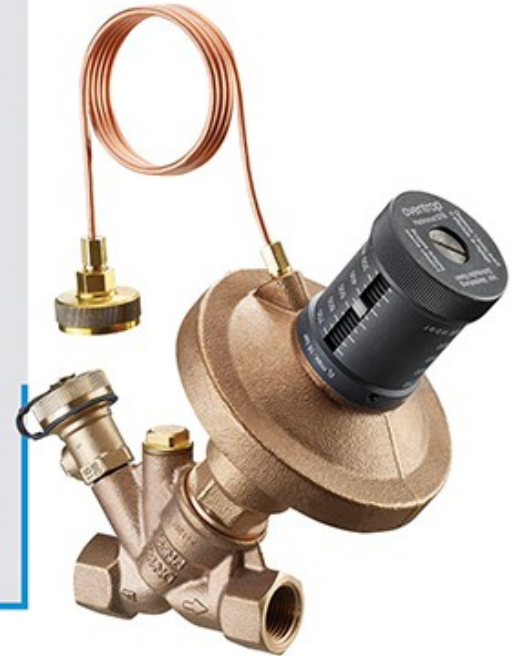

BRC Welded Roofing mesh we use in fixing of Reinforcement solutions to the construction industry. This reinforcing mesh has a wide variety of uses ranging from the ordinary house to heavy industry.

oventrop

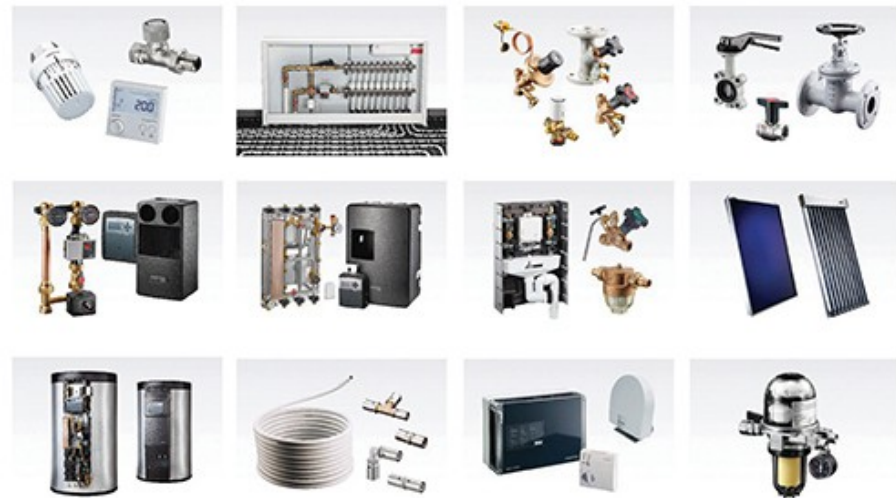

PRODUCTS

Oventrop is one of the leading German manufacturers of valves and controls for the Building Services Industry.

The company is an expert partner to the stockists, consultants, contractors and industry. Oventrop offers its customers a long term beneficial relationship.

- Control, regulating and isolating valves
- Smart home, centralized building & other electronic controls
- Hydronic balancing in heating & cooling systems
- Isolator and other pipe fittings
- Connection of heat generators to the heating circuit/Hot water supply.

COOLING TOWERS

Cooling towers are heat rejection devices used to transfer process waste heat to the atmosphere. Two key elements are Water & Air.

S.L.J. Holdings are committed to freezing climate change by improving cooling through the limited use of natural resources and by offering world renowned branded Cooling Towers.

S.L.J. Holdings selected innovative branded cooling towers are of the highest industry quality standards certification along with its dependable long life performance backed by our very own Spectre Trading Installation, Service, Maintenance and After Sales division.

TYPES OF COOLING TOWERS

- Open Cooling Towers
- Ice Thermal Storage Products
- Closed Circuit Cooling Towers
- Evaporative Condensers
- Hybrid Coolers & Modular Hybrid Coolers
- Adiabatic Coolers
- Hybrid & Adiabatic Condensers

4-Zero

E-Therm

NuWave®

NuWrap5®

Thermotec is an Australian based manufacturer and distributor of thermal insulation, acoustic solutions and polyethylene foam products. Our extensive product range is manufactured with sustainability in mind for both domestic and commercial applications.

4-Zero

THERMAL PIPE INSULATION

Thermotec products, such as 4-Zero pipe insulation, are trusted to exceed performance expectations, and are designed to meet or exceed the Building Codes of the Countries, States, Provinces or industry categories where they are specified and installed.

E-therm

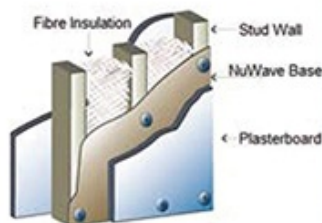

INSULATION

E-therm is a 3 in 1 reflective foil insulation solution replacing traditional foil sarking, bulk fibre, and acoustic noise insulation with one easy product.

Thermotec NuWave® Acoustic products are designed to meet the requirements of modern buildings, building standards and codes of the Countries, States or Industry categories where these products are specified and installed.

**GREEN STAR
COMPLIANT**

Thermotec NuWrap5® acoustic pipe and duct lagging is classed as a “one solution” product that can be used either indoors or manufactured for use outdoors. NuWrap5® uses a barium loaded limp polymer with a mass of 5kg per square metre. It is faced with a scrim reinforced fire resistant aluminium foil and bonded to a high performance polyether - polyurethane de-coupling open cell foam. NuWrap5® is suitable for soil/waste pipes and all types of ductwork.

Hot & cold pipe insulation
Energy efficient
Non-toxic
Meets low V.O.C.

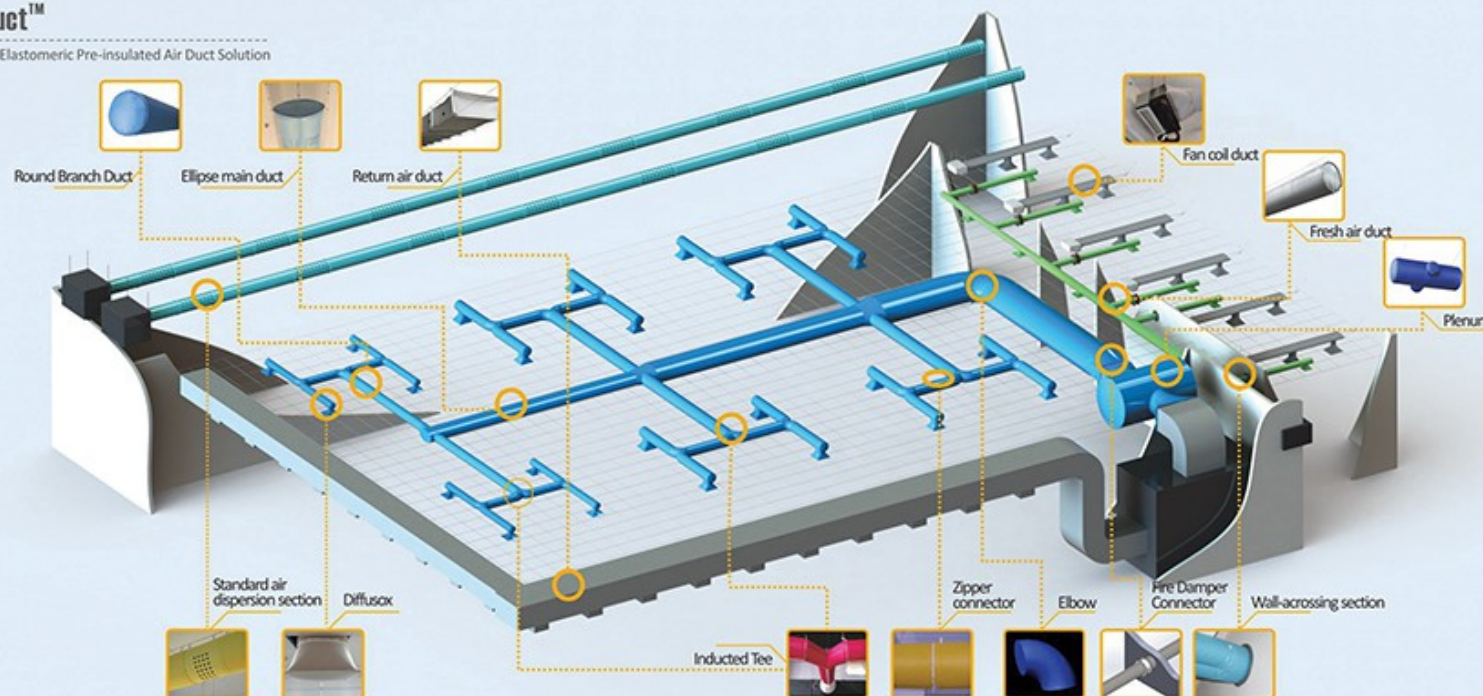

Durkflex is the global leading supplier and the leader of elastomeric composite thermal insulation material.

So far, Durkflex has four separate brands for elastomeric thermal insulation: Durkflex, Fiberflex, Durksonic-QEP, and innovative pre-insulated fabric air duct system, named "Durkduct" system.

PACKAGING & ACCESSORIES

Pre-Insulated Ducting Products

The insulation solutions developed by Saint-Gobain ISOVER are marketed around the world under the ISOVER international brand. These self-bearing duct systems are quick and easy to install. They perfectly replace conventional insulated metal ducts. They provide excellent thermal, fire, acoustic and air quality performance.

Pre-insulated
ducting
Climaver

The Doka logo is displayed in a stylized, lowercase blue font within a yellow rectangular box. The background of the entire slide features a large-scale construction project with a tall building under construction, its upper floors encased in a dense, yellow Doka formwork system. Two large tower cranes are visible against a blue sky with scattered white clouds.

THE FORMWORK EXPERTS

Doka is a **world leader** in developing, manufacturing and distributing formwork technology for use in all fields of the construction sector.

With more than 160 sales and logistics facilities in **over 70 countries**, Doka has a high-performing distribution network which ensures that equipment and technical support are provided swiftly and professionally.

Doka offers formwork solutions for all areas of construction activity – for anything from housing developments to transportation infrastructure and power-generation facilities, or for building the world's tallest structures. You can choose from formwork systems and components for any construction project and any requirement.

► System Components ► Wall Formwork ► Floor Formwork ► Climbing Formwork ► Load-bearing Systems ► Safety Systems

Thinking solutions.

Today, Reflex Winkelmann GmbH is one of the leading international solutions providers for the development and maintenance of water-bearing systems for building and supply technology.

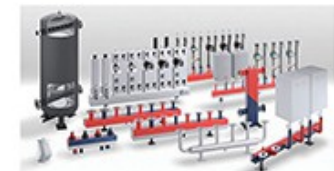

They are an initiator in the development of top quality products, intelligent concepts and highly efficient solutions for systems on any scale and level of complexity.

In an age which makes the responsible handling of resources a key issue, Reflex is synonymous with maximum efficiency, safety and sustainability.

PRODUCTS

- Diaphragm expansion vessels
- Pressurisation stations
- Degassing systems & separation technology
- Water make-up systems & water treatment technology
- Storage water heaters & heat exchangers
- Solutions for modern plant engineering

LAWTON

TUBES

The Lawton Tube Company Limited is the UK's leading independent manufacturer and distributor of copper tube.

Established as a Limited Company in 1920 and still family owned!

SINCE 1918

Copper has a proven performance and provides a cost effective solution to many pipe work and tube requirements on the basis of its inherent properties.

These include:

- ⊗ High strength and ductility
- ⊗ Excellent corrosion resistance
- ⊗ Compatibility with a wide range of fluids
- ⊗ High thermal and electricity conductivity
- ⊗ Excellent fabrication & joining properties

With a range of Kitemarked products from stock, supported by quality systems audited to BS EN ISO 9001:2008, we aim to provide you with a first class service at competitive rates.

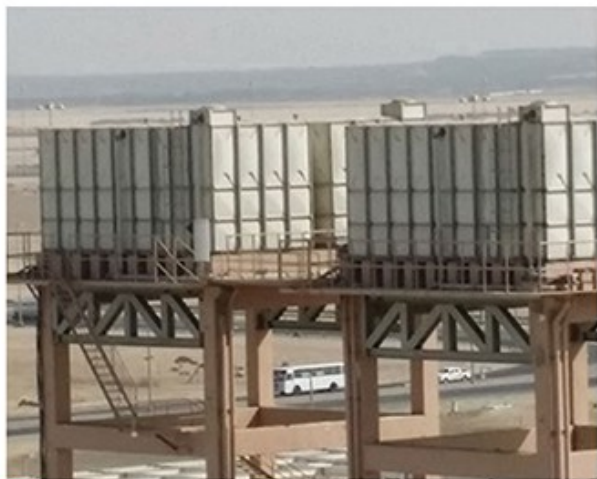

Copper Tubes supply Areas:

- ⊗ Publing
- ⊗ ACR
- ⊗ Engineering
- ⊗ Medical

Hi-tank utilizes SMC (Sheet Molding Compound) molding technology which is reinforced from Unsaturated Polyester resin and glass fiber, based on technology for years, our quality as to manufacturing for small, medium and big water tanks has been highly regarded.

Hi-tank satisfies 100% condition of hygiene, watertightness, durability which is required for SMC water tank. Thanks to this high-accumulated technology, this water tank is certified by ISO 9001, SINGAPORE PSB, UK WARS, therefore this quality has a world-class guarantee.

RAKtherm[®]

Ultimate Piping Solutions

Pioneered PP-R & PEX System

With 50 years warranty, bringing the most comprehensive piping solutions for diverse water application using the latest German Innovation Technology

German Technology, with the widest range of PP-R piping system using the latest innovation technique.

DWV - RNP Technology First Reinforced Multi-layer PVC-U in the Region

RNP Technology in RAKtherm's Multi-Layer Reinforced PVC-U brings technological breakthrough in the piping industry!

RAKtherm is the very first manufacturer to unveil the secret of the new groundbreaking RNP Technology!

Specially formulated PVC-U resins by RAKtherm from main raw materials sourced in the USA.

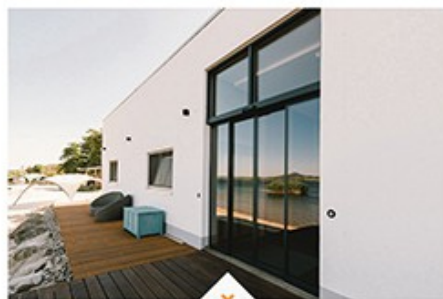

DESIGNED | DEVELOPED | MADE IN GERMANY

The outstanding quality Deuschtec offers is due to Deuschtec's Research and Development team's continuous creative endeavors to meet your needs for exceptional & modern entrance solutions. Deuschtec Electronics, Mechanical Engineering, Software and Design departments are constantly on the move to devise revolutionary systems for you.

Main areas of work in this division are supply and application of waterproofing structural repairing materials, external and internal coatings. We use high quality service with best rates with which will lead our customers in full satisfaction. We will completely waterproof the affected areas with warranty.

WATERPROOFING

THE PRODUCT RANGE

- **MAXPLY-40/50**
UV-Resistant waterproofing bituminous sheet
- **MAXPLY PRIMER**
Water-based bituminous emulsion
- **MAXSEAL FLEX**
Flexible cement-based waterproof coating for concrete and masonry
- **MAXSEAL SUPER**
Cement-based waterproof coating with crystallisation and osmotic properties
- **MAXSEAL FOUNDATION**
Waterproof, cement-based coating for exterior underground concrete & masonry.
- **MAX GROUT**
Non-shrink, high-resistance fluid mortar for fillings, anchorages and structural repair
- **MAXSHEEN**
Waterproof and protective acrylic coating for outdoor use over concrete, masonry, render and plaster
- **MAXPLUG**
Quick-Setting hydraulic mortar for stopping leaks under pressure
- **BISEAL WA**
Chloride-Free Waterproofing liquid admixture for concrete and mortars
- **DRIZORO MESH**
Glass fibre mesh for reinforcement of coatings and cement mortars
